

EMERGENCY RESPONDERS NETWORK INCORPORATED

"...preventing unnecessary loss of life"

First on Scene™ - Safety Training

THE PROFESSIONALLY DESIGNED CPR, FIRST AID & AED TRAINING PROGRAMS

It is bound to happen eventually...

Most of us will witness in some way, the heart pounding urgency and life or death struggle of a family member or stranger experiencing a life-threatening crisis. Eventually emergency crews will arrive and fight the clock to restore the heart beat which provides the life-saving oxygen to an unconscious victim. What you do before they arrive may make the difference between them living and dying. **Are you prepared?**

Are you rescuer material...

Whether responding to a cardiac arrest, a medical emergency or an injured victim, it will always come down to the trained rescuer! And while properly preparing yourself for an emergency is important, there is no need to be intimidated by the process... or as we like to say: **"We're not looking for people with ability, we're looking for people with availability!"**

Certified by the American Heart...

All of our on-site CPR, First Aid and Automated External Defibrillator (AED) training courses are certified by the American Heart Association (AHA). Upon completion, each student will receive a nationally recognized certification card good for up to 2 years. In other words: **We use the Gold Standard!**

Instructed by the best...

Our lead instructor Mike Myers - a Fire Captain and Paramedic - brings over 20 years of real-life experience. All of our instructors, however, have a Professional Emergency Responders background (i.e. Paramedics, Firefighters, etc...) and teach using anecdotal experience that other courses simply cannot provide. When possible, we even try to sneak in humor to make these courses the most informative and enjoyable they can be! In other words: **This is a course that you'll not soon forget!**

COURSES OVERVIEW

American Heart Association Training courses include:
BLS for Health Care Providers • Friends & Family CPR & First Aid for Adults and Children • HeartSaver CPR, First Aid & AED for Adults, Children & Infants. See below for details.

CPR

All of our CPR courses include:
